

Additionally, upon careful review of the specification, paragraphs [0015], [0018], [0019], [0031], [0034], [0037] and [0038] were found to contain minor informalities, easily corrected by submission of replacement paragraphs as attached to this response.

In the Claims

Applicant notes, as properly authorized and entered, the Examiner's Amendment to Claims 3, 13, 14 and 17. In addition, based on correction of the minor informalities in the specification, as referred above, Applicant found additional informalities in Claims 10, 13 and 17. Applicant has attached a complete listing of the claims which clearly marks deleted and added language reflecting the examiner's review as well as that of the applicant. Applicant notes that such an amendment is made only for this informalities issue, an issue tangential to patentability or securing a patent, and not for a reason related to securing a patent, or changing or otherwise affecting the scope of intended claim coverage.

By the above, the Applicant has provided a timely response to the outstanding Official Action of March 30, 2007. Applicant further notes that prosecution has been closed on the merits by the examiner who has issued a Notice of Allowability. Accordingly, the Applicant respectfully submits the required issue fee and documents along with the above-referenced specification and claim amendments, and requests that the present application be passed to issue.
